

**\*\*\*IMPORTANT NEW HIV TREATMENT INFO\*\*\***

# THE ART

**REGIMENS ARE CHANGING  
IN SOUTH AFRICA**

**for first-line and some  
people taking second-  
line treatment**

**THE NEW COMBINATION IS BASED ON DOLUTEGRAVIR**

**?  
WHAT IF I AM  
ALREADY ON  
EFAVIRENZ-  
BASED ART?**

**IF YOUR VIRAL LOAD HAS  
BEEN UNDETECTABLE YOU  
CAN EASILY SWITCH FROM  
EFAVIRENZ TO DOLUTEGRAVIR.**

The other two drugs in your regimen will stay the same. These are usually tenofovir + lamivudine or emtricitabine.
